

Golf wagering has always been a huge market, now it has a modern clubhouse!

The social prediction market for golf. Social-first since 2020.

Raising \$2.5M · SAFE · \$11.0M Post-Money

September 2026

IMPORTANT NOTICE

Disclaimer

Confidentiality

This presentation is confidential and is provided for discussion purposes only. It may not be reproduced, distributed, or disclosed to any third party without the prior written consent of Social Parlay.

No Offer of Securities

This presentation does not constitute an offer to sell, or a solicitation of an offer to buy, any securities in any jurisdiction. Any offer or sale of securities will be made only pursuant to definitive transaction documents and in compliance with applicable securities laws.

Forward-Looking Statements

This presentation contains forward-looking statements, including projections of market size, trading volume, revenue, users, and profitability. These statements are estimates based on assumptions that are inherently uncertain and are not guarantees of future performance. Actual results may differ materially.

Third-Party Data

Market data and industry statistics cited herein are drawn from third-party sources believed to be reliable. Social Parlay has not independently verified this information and makes no representation as to its accuracy or completeness.

Regulatory Considerations

Prediction markets and event contracts are subject to evolving regulation. Availability of the platform and its products may vary by jurisdiction, and there is no assurance that required approvals or exemptions will be obtained or maintained.

Risk of Loss

An investment in an early-stage company involves a high degree of risk, including the possible loss of the entire investment. Prospective investors should conduct their own due diligence and consult their own legal, tax, and financial advisors.

All dollar figures are expressed in U.S. dollars (USD) unless otherwise noted. By reviewing this presentation, you acknowledge and agree to the foregoing. © 2026 Social Parlay. All rights reserved.

THE FOUNDING THESIS · EST. 2020

The 19th Hole

Golfers don't need to be taught to bet. Every weekend group already has a skins game, a nassau, somebody pressing on 14. The 19th hole is where it all gets settled — over drinks, with the scorecards out. Nobody has ever built software for that room. That's what we've done.

BUILT SOCIAL-FIRST SINCE DAY ONE

- 2020** Parlay Social Inc. is incorporated. The first line of the original charter: "Social Parlay is, first and foremost, a social application."
- 2021** The first thing we built was a social golf game — profiles, friends, challenges. No markets yet.
- Today** The hard part is built: a P2P orderbook, multi-source golf data, on-chain settlement. Running on devnet.
- Next** Put the social product on top of the market engine. This page is that plan.

THE INSIGHT

Golfers already bet. Just not on anyone's platform.

Observe a Saturday foursome. Games get priced on the first tee, tracked in someone's head, settled in the parking lot or the group text. It works. None of it happens in an app, because no app has ever replicated the group dynamic.

01

Priced on the tee

02

**Tracked in heads and
scorecards**

03

Settled at the 19th hole

GOLF DEEP DIVE

One Golf Tournament Drove **\$545M** in Prediction Market Volume.

The 2026 Masters generated \$545M on Kalshi — the largest pure-sports handle in the platform's history.

"Kalshi recorded \$545 million in volume on the Masters, beating the most recent Super Bowl."

- **Bill King** , Sports Business Journal, April 17, 2026 sportsbusinessjournal.com/Articles/2026/04/17

And it happened on a trading floor: solitary, anonymous, one market at a time. **Most golfers don't bet because they love markets. They bet because their friends are in.**

GOLF DEEP DIVE

Demand is proven. The gap is social — and depth.

Golf already clears hundreds of millions on a generalist exchange — \$460M in one outright at the 2026 Masters. What's missing is a product that speaks golf: deep books, live data, and clubhouses, follow, copy-trading and leaderboards.

What a generalist exchange is

- ~85% of golf volume sits in one outright book; dozens of other golf markets trade thin
- Generic event-contract shell shared with politics and weather; American odds bolted on
- No golfer-grade player or round data in the trade ticket
- Its social feature (Apr '26) follows posts, not positions — no automatic copy-trading, nothing golf-native

What Social Parlay Builds

- Follow traders and see their positions
- Copy-trading
- Live trading leaderboards
- Comments and trollbox
- 4–6 deep market types: outright, top-5 / top-10, make-cut, featured H2H, 3-ball
- DataGolf-fed player and round data in the ticket, auto-resolution
- Golf-native UX, not a general prediction app

The leading generalist exchange generated ~\$1.3B in estimated annualized sports revenue (FT, Feb 2026). A golf-native layer on the books that already trade is the gap.

WHY I'M BUILDING SOCIAL PARLAY · COLIN MASTERS, CO-FOUNDER & CEO

I took up golf in my thirties and got hooked. My co-founders showed me the course was a market.

BEFORE GOLF

Seven years on trading floors at JPMorgan, Deutsche Bank and Barclays, building the market data systems that turn a dozen feeds into one price an application can trust. Eight years after that building products people hold in their hands, including Blockstream Green, an open-source Bitcoin wallet — where I learned what it means to hold other people's money in software.

THE FIRST TRY

In 2020 we built a wagering app for golf friend groups. About 200 people used it and it failed: an app inside one friend group can't reach the depth that makes a market work. We shut it down, kept what people loved about it, and in 2024 rebuilt from the market up.

WHAT GOLF IS

A deep book with no data is a slot machine. Data with no one to trade against is a stats site. And a market with no one to argue with isn't golf.

Full story at investors.socialparlay.com/founder-story

THE PRODUCT

Six rooms in the clubhouse

Anyone can create a clubhouse for their own group, and every clubhouse gets all six rooms.

The Clubhouse

Start one for your own group: a private space with chat, live positions and leaderboards. Consolidates the trash talk and the bet tracking scattered across iMessage.

The First Tee

A friend sends an invite. Accept, add a payment method, join in under a minute. No wallet, no seed phrase.

The Challenge Board

Peer-to-peer head-to-heads between friends, visible to the whole group.

The Money Game

Pooled group positions tracked as a single slip: skins, nassaus, presses, on a live tournament.

The Gallery

Live tournament feed during play: position swings and hole-by-hole markets.

The Range

Free tier: trick-shot uploads and skill challenges, no money at stake.

The social product is planned, not yet built; sequencing is on The Build. Feature roadmap is directional and subject to regulatory review by jurisdiction.

THE MONEY GAME, IN PERSON

Every game your club already plays. Settled on Arcline.

The clubhouse isn't only for tournament week. The games golfers actually play — at their own club, against people they know — get a slip, a leaderboard and a settlement, the same as a Masters market.

**Club championships**

Flights, matchups and the outright, priced by the members

**Wednesday four-balls**

The standing game, tracked week to week

**Men's night**

Skins and side games, settled before the first round at the bar

**In-person events**

Course activations and member days, live on the board

Same engine, same escrow, same instant settlement. The clubhouse goes wherever the golf is.

Club-event formats are directional and subject to regulatory review by jurisdiction.

Everyone else stops at the Tour.

We cover golf all the way down to Saturday's four-ball.

THE FIRST CLUBHOUSE

The Elks Golf & Country Club

The inaugural clubhouse on the platform. Members-only, invite-only, capped membership. Members get early feature access and take part in live course activations.

CLUBHOUSE · FLAGSHIP

The Elks Golf & Country Club

● INVITE-ONLY

ACCESS

Members-only

MEMBERSHIP

Capped

Joining: By invitation

Role: Inaugural clubhouse

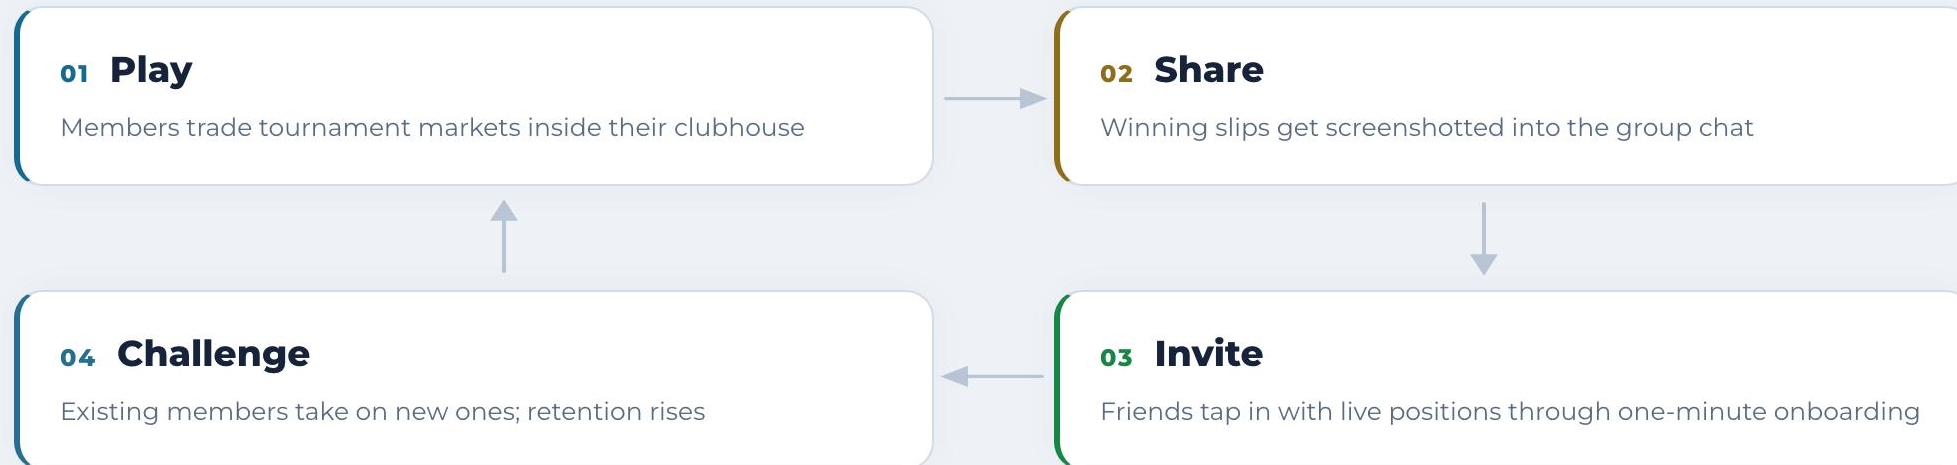

Status: Concept

MEMBER BENEFITS

- 01 Invitation from a member
- 02 Live course activations
- 03 Early feature access

WHY IT COMPOUNDS

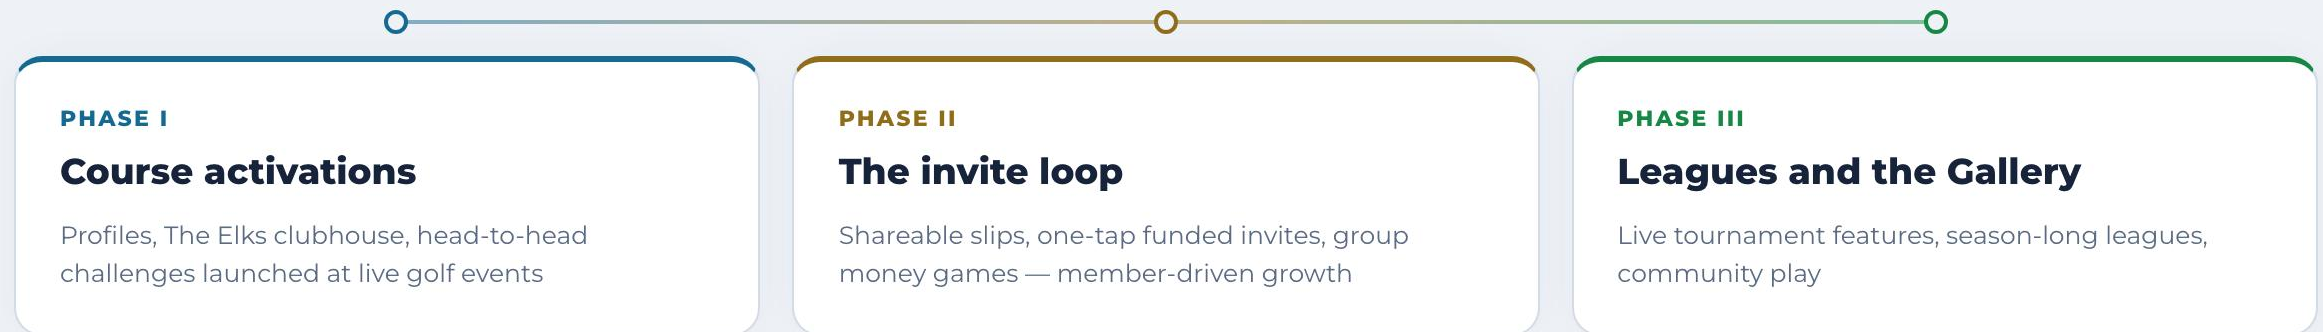

Members bring members

Acquisition cost falls as the network grows. This is the CAC model.

THE BUILD

How we sequence it

Feature roadmap is directional and subject to regulatory review by jurisdiction.

PRODUCT READINESS

What's built

Two years on the market underneath. The social product goes on top.

CORE ENGINE

- ✓ Live P2P orderbook with on-chain matching and settlement; the operator never takes the other side

BLOCKCHAIN

- ✓ Custodial escrow and wallets on Solana via Triton One; devnet today, mainnet in 2027 H1

DATA

- ✓ Multi-source live player, round and course data, verified across feeds and auto-resolved

SOCIAL

- ✓ Follow and copy-trading, live leaderboards, comments and trollbox, profile visibility, shareable tickets

Full market lifecycle on Solana, live on devnet with the founding team and friends.

Built by Marketplace Veterans

Colin Masters Co-Founder & CEO

- British Army veteran, three operational tours with the Royal Irish Rangers, then bricklayer, then a computing degree earned while working his way onto trading floors
- iOS lead on Blockstream Green, the open-source Bitcoin wallet, deep crypto product experience
- Founded Social Parlay in 2020 as a golf wagering app (~200 users, shut down); rebuilt it as a peer-to-peer exchange in 2024 and took the Arcline AMM and Solana settlement build to closed beta
- 15+ years engineering: 7 building algorithmic trading and market-data systems at JPMorgan, Deutsche Bank and Barclays in New York and London, then 8 leading consumer product teams
- Led global engineering teams (Apple Platforms Lead, Neone); shipped a US App Store Top-20 app, Featured by Apple (SHRED)
- Strategy, fundraising, and product vision, leading the \$2.5M SAFE round

Jason Lee Co-Founder & CTO

- Formerly Senior Engineer at Triton One, the Tier-1 Solana RPC provider powering the platform's settlement infrastructure. Full-time at Social Parlay.
- Co-Founder at Fenix Global, where the core Social Parlay team first collaborated
- Principal Engineer at One Medical, consumer platform engineering at scale
- Leads engineering across the Arcline AMM, Solana custodial wallets, and multi-source golf data integrations

Kris Dahl
CFO

Former TD Bank exec. Financial ops & compliance.

Chris Gillard
Sales & Marketing

Golf industry relationships & go-to-market.

Jared Clark

MARKET OPPORTUNITY

Prediction Markets Are Forecast to Hit **\$1 Trillion** by 2030.

Sports drive the majority of prediction market volume. Bernstein (Apr 2026) forecasts \$51B of volume in 2025 and ~\$1T by 2030, an ~80% CAGR.

PREDICTION MARKET VOLUME TRAJECTORY

REGULATORY LANDSCAPE

The War Was Fought. The Market Is Open.

The incumbents fought and paid to open this category. We don't need to fight the frontier: we follow into opened markets, and we geo-fence by default until counsel says otherwise.

"States cannot circumvent the clear directive of Congress. If you interfere with the operation of federal law in regulating financial markets, we will sue you."

- **Michael S. Selig** [CFTC Chairman · Defending event contracts against state bans · CFTC v. Wisconsin, Apr 28, 2026](#)

- **The Category Is Onshore**

CFTC-registered DCMs made event contracts a mainstream product. Kalshi and distribution through Robinhood and Coinbase opened the category. That is their war and their cost.

- **Capital Is In**

Kalshi raised \$1B at a \$22B valuation in May 2026. Bernstein forecasts \$240B of prediction-market volume in 2026 and \$1T by 2030.

- **The Fight Is Live, and That Is Useful**

Twenty-plus state actions and a live circuit split. We do not need to fight the frontier; we enter jurisdictions where a licensed operator is already allowed.

- **Geo-fence First**

We are not a DCM and we do not claim the preemption shield. A licensing / registration pathway is under discussion with counsel. Until counsel recommends otherwise, geo-fence is the default.

GOLF DEEP DIVE

One Golf Tournament Drove **\$545M** in Prediction Market Volume.

The 2026 Masters generated \$545M on Kalshi — the largest pure-sports handle in the platform's history. \$460M of that (84%) was the outright champion contract.

TRACTION

Milestones & Roadmap

v1 shipped and was shut down in 2020. The exchange was rebuilt from 2024 and is live on devnet with the founding team and friends. This raise funds regulatory guidance and the 2027 H1 mainnet launch.

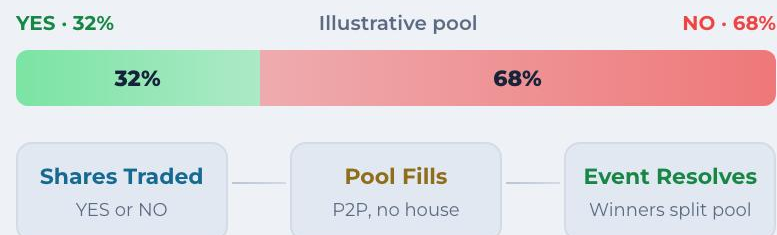

- 2020 ● **v1: social golf wagering app** ~200 users. Shut down. A market inside one friend group can't get deep enough to work. The idea survived.
- 2024 Q1 ● **Rebuilt as an exchange** Research, product design, core architecture
- 2024 Q3 ● **Pre-Seed ~\$250K** Friends, family, and angels
- 2025-26 ● **Platform Built** On-chain order book, custodial escrow, and settlement on Solana · multi-source live player and round data, auto-resolution · leaderboards, follow, copy-trade
- 2026 Apr-May ● **Devnet Live** Full market lifecycle on Solana. Founding team and friends
- 2026 Q3 ● **This Raise** **IN PROGRESS** Raising SAFE. Regulatory framework and guidance with counsel. Build a real CAC / GTM plan
- 2027 H1 ○ **Mainnet + Gated Launch** Security audit, mainnet deploy. CAC via partnerships for first real users on majors + signatures, 4-6 deep market types
- 2027 H2 ○ **Expand** Weekly PGA Tour events beyond majors and signatures

As of August 2026 · Devnet live, team and friends · SAFE round open

THE PRODUCT

Prediction Markets Built for Golf

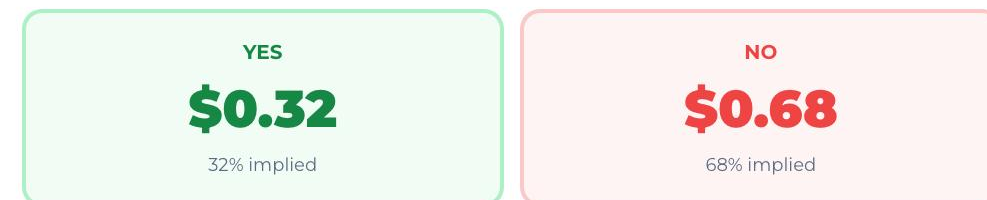

Trade YES/NO golf contracts against other fans. Live golf data in the ticket. Follow, copy-trade, and climb the leaderboard. Clubhouses for your crew: private groups alongside the Tour markets. Escrow and settlement on Solana. The house never takes the other side.

THE MASTERS 2026

Scottie Scheffler wins?

#3	James R.	YES Morikawa	+\$174
#4	Priya S.	YES Top-5	+\$91

HOW IT WORKS

A Real Orderbook.

HOW TRADES EXECUTE TODAY

Buyers fill against resting sell orders on a peer-to-peer book first, and anything left is minted by an on-chain bonding curve that moves the price with every order; sells post to the book once a market clears its liquidity threshold.

SCHEFFLER YES, LIVE ORDERBOOK		Price · Size (shares)
SELL	\$0.36	420
SELL	\$0.35	810
SELL	\$0.34	1,200
spread \$0.01		
BUY	\$0.33	950
BUY	\$0.32	640
BUY	\$0.31	380

HOW WE MAKE MONEY

Settlement Fee

Deducted on-chain

A flat 2% of the settlement pool, deducted on-chain before winners are paid when the event resolves.

2%

of the settlement pool

On-chain

at event resolution

Taker Fee

Order book sells

A flat 0.5% charged to the seller on order book fills. Buyers pay nothing to enter a position.

0%

to buy in

ROADMAP: ZERO-COST TRADING

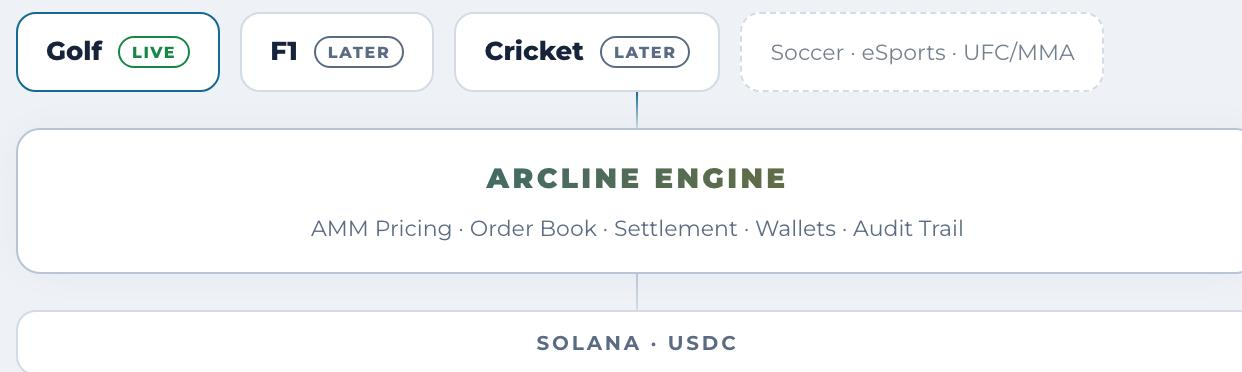

ROADMAP

Target model: no taker fee, with maker and taker rebates paid from the settlement pool at resolution. Roadmap; not yet built.

ENGINE OPTIONALITY

Golf is the proof. Arcline is the platform.

Social Parlay is a golf-only product and stays that way; it is where the technology is proven. Arcline is the engine underneath it: pricing, settlement, wallets, and audit. Each future vertical (F1, cricket) is its own fan experience built on Arcline under its own brand, never a rebadged Social Parlay. Operators can also license Arcline outright. Both are options we earn by proving golf first.

F1

24 race weekends a year, a global and fast-growing fanbase, and a natural fit for field markets: race winner, podium, and driver head-to-heads on live timing data.

CRICKET

One of the world's largest fan bases (IPL, T20, international tests), rich multi-outcome markets, and in-play potential from ball-by-ball data feeds.

LICENSING MODEL

Option value — exercised only after golf is proven

\$180–250K

annual platform fee

+ rev share

on partner volume

Software revenue, not wagering revenue. Recurring, higher margin, lower regulatory exposure, and it prices on an infrastructure multiple rather than a gaming one.

Golf is the only vertical in production. Each future vertical is a data integration, not a rebuild — and none ships before the golf books are deep.

GO-TO-MARKET · 2027

A funded path to 5,000 users and first revenue

This slide is the CAC slice of the raise — the 50% marketing allocation (**\$1.25M of \$2.5M**), broken out below. Marketing is the single largest line of the raise because the model's growth engine is user acquisition — and we start from an existing community, not from zero.

WHERE THE BUDGET GOES — \$1.25M

Partnerships & venues

40% · \$500K

Golf platforms, clubs, leagues, and creators with existing audiences. One partnership seeds 20–50 users.

Community & content

25% · \$312K

Discord community (5,000+ followers today), r/golf (1.2M), organic content timed to majors.

Majors & activations

20% · \$250K

Tournament-week campaigns — Masters and signature events drive 3–5× engagement spikes.

B2B licensing

15% · \$188K

Prediction layer to golf apps and venues that already have the users — they arrive on the partner's dime.

WHAT IT FUNDS

8,300

Users funded at \$150 blended CAC

1.7× the 5,000-user line booked for 2027

\$125K

First revenue year (2027)

5,000 users × \$25 avg revenue — exactly the model's line

100K → 1M

User ramp 2028–29

The model builds ~10× a year on the base this budget funds

\$25

2027 blended rev / user

Narrows to ~\$15 by 2032 as white-label mix grows

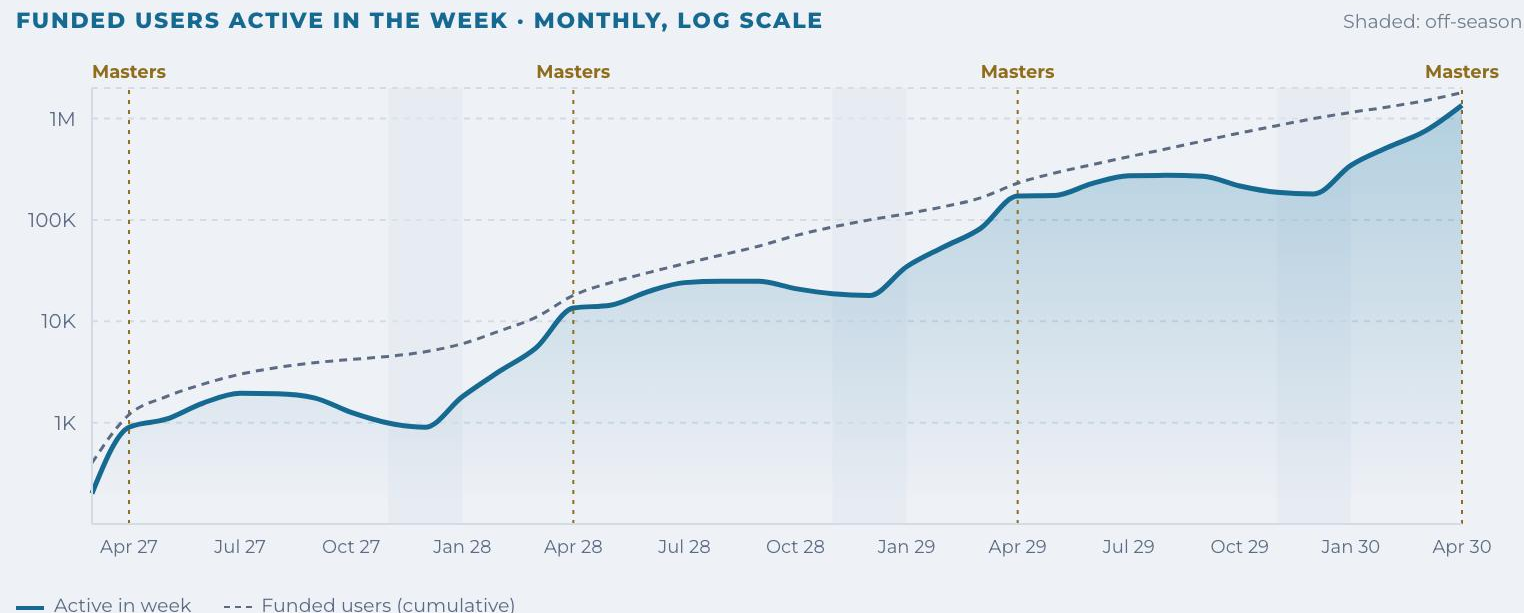

Channel allocation is directional — to be refined in year 1. Counsel stays a separate line on the Ask, kept out of CAC. Numbers per the Company model (Aug 2026; user path revised Sep 2026).

USER PROJECTIONS

Golf trades in seasons. The floor rises every winter.

Activity peaks at the majors and drops when the Tour goes quiet. The test of the business is not the April spike, it is how many funded users are still trading in January. Each winter floor lands above the previous Masters peak.

FUNDED USERS ACTIVE IN THE WEEK • MONTHLY, LOG SCALE

**2027 • Stage 1 • Course activations**

Gated mainnet launch ahead of the Masters. Majors and signatures only. ~5K funded by year end; 0 → 100 course activations.

2028 • Stage 2 • Funded invites

Weekly Tour calendar. Referrals and funded invites from active traders. ~100K funded; winter floor ~18K, above the prior Masters peak.

2029 • Stage 3 • Leagues and partnerships

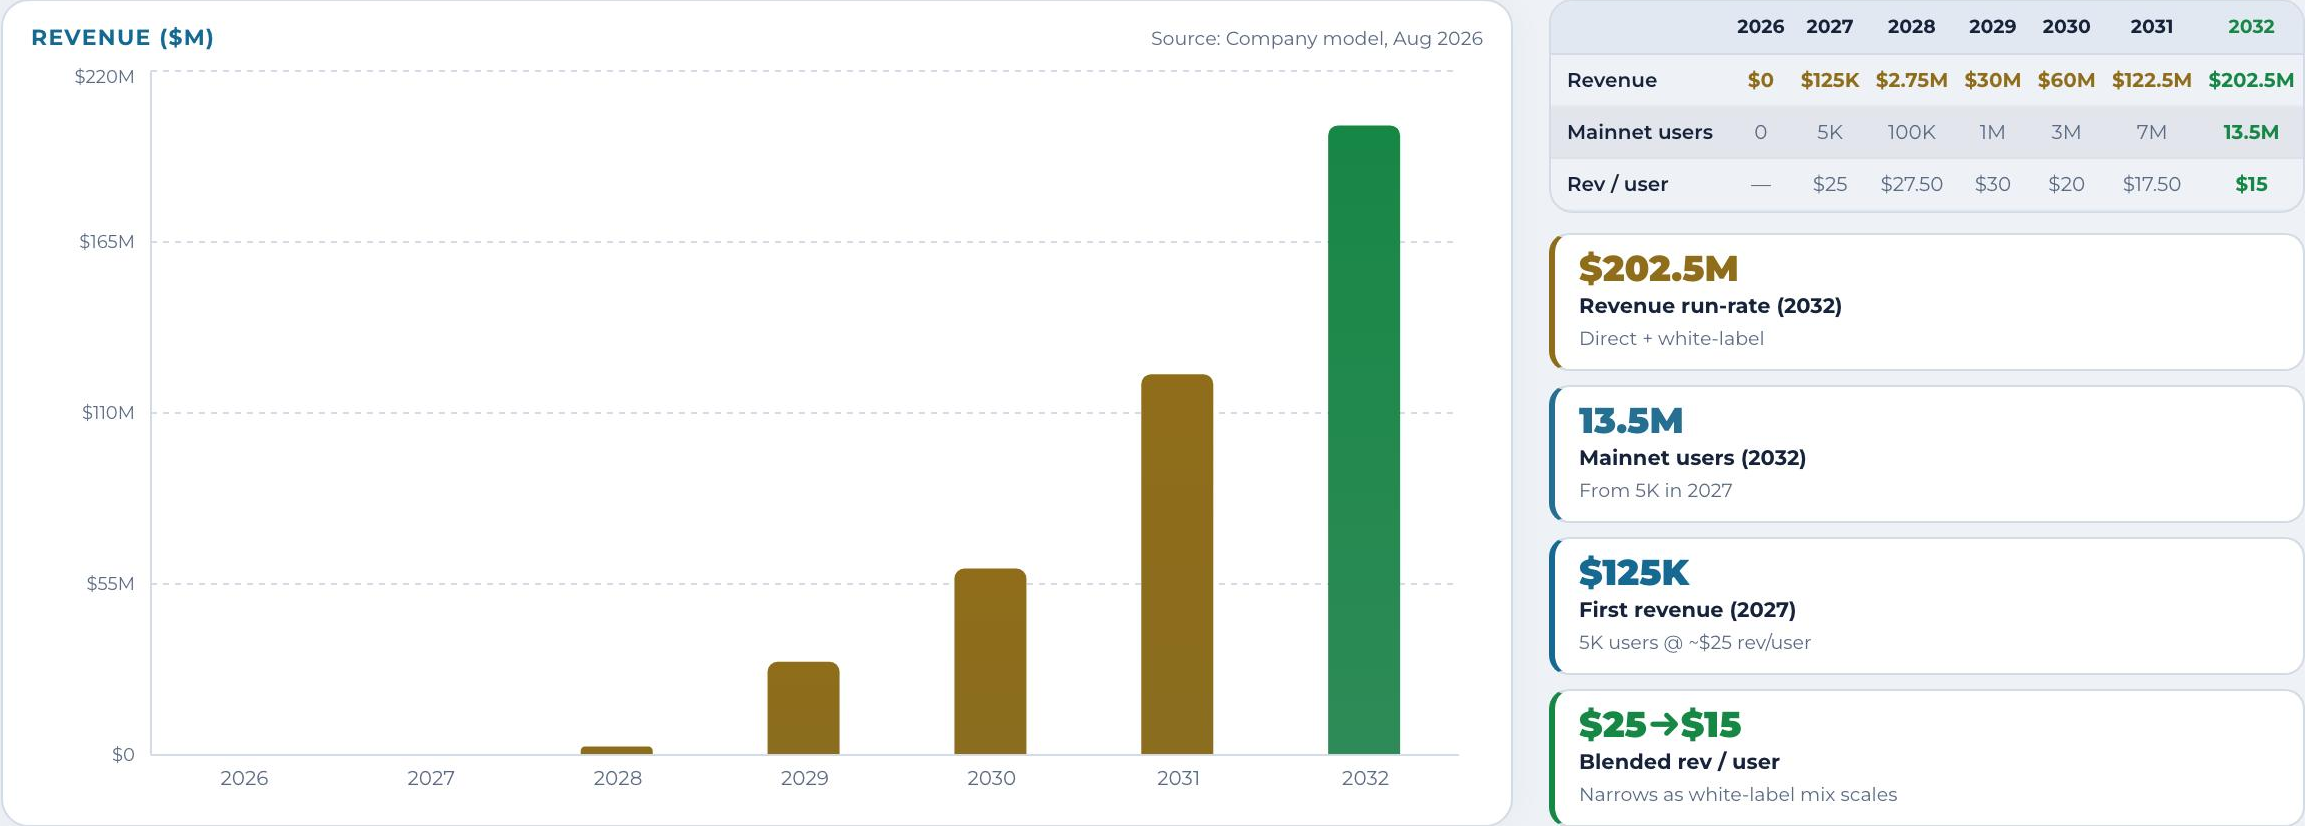

League play and first white-label pilots. ~1M funded, on track for 3M by end-2030. Beyond the 2030 Masters: appendix scenario.

Year-end funded totals match the company model (Aug 2026); 2030 shown through the Masters. Monthly shape is illustrative of the Tour calendar, not a forecast. Blended rev/user ~\$25-\$30 in this period.

FINANCIALS

Revenue Growth Projection

2026–2032 model for the Arcline Engine, assuming successful execution of the roadmap and each funding raise. Cumulative capital raised 2026–2029: **\$87.5M**.

1M users clears Aug-2026 opex lines; opex being reloked

MARKET VALIDATION

Category comps, not our multiple.

Prediction markets are real and capitalized. Golf already prints exchange volume.

Company	Sector	Metric	Value	Source / date
Kalshi	Prediction Markets	Annualized sports revenue	\$1.3B (Feb 2026) → ~\$4B (2026)	FT via Yahoo · SBJ
Kalshi	Prediction Markets	Masters week volume (golf)	\$545M (Apr 2026)	DeFi Rate · SBJ
Polymarket	Prediction Markets	Daily volume	\$200–300M	Polymarket
DraftKings	Sportsbook (DKNG)	Sports revenue	\$2.7B (2023)	DKNG 10-K
FanDuel	Sportsbook (Flutter, FLUT)	Sports revenue	\$2.4B (2023)	Flutter 10-K
Golf (category)	Golf betting	Volume growth	+33% YoY (2026)	SBJ
BetMGM	Sportsbook	Sportsbook volume	\$37B+ (2025)	SBJ

Kalshi showed golf can clear hundreds of millions on a generalist exchange. We're not the same stack with more tickets, we're golf-native (data, UX, 4–6 deep books, follow / copy-trade).

EXIT

Built to a \$200M+ revenue pace — then a target

The model reaches a **\$202.5M revenue run-rate by 2032**— golf vertical plus white-label engine — at which point the company is an acquisition target. A seed outcome can still be a strategic tuck-in: the golf wedge, engine, and audience.

BUYERS (NO FAKE TICKERS)

DraftKings (DKNG)

Sports + predictions — already buying adjacent platforms.

Flutter (FLUT)

FanDuel is a Flutter brand — the other US sports giant.

Kalshi

Already in golf; may buy a golf-native layer rather than build it.

Golf / media / venue platforms

The prediction-layer thesis, licensed in. No logos.

RETURN MATH — RANGES, NOT ONE NUMBER

Company model (2032)

\$202.5M revenue run-rate. Gaming / marketplace multiples of 3–8× → **~\$600M–1.6B**, before a strategic premium.

Base (2030, mid-model)

\$60M revenue at 3–8× → **\$180–480M**.

A golf-native book with real users, retention, and an engine someone else can plug in is a buy. White-label infrastructure is the second exit vector (Arcline Engine, licensed).
